

NovaTech Solutions — Company Overview

Who we are, what we build, and how we support our customers

About NovaTech Solutions

NovaTech Solutions is a consumer technology company specializing in smart home devices, wireless accessories, networking equipment, and AI-enabled consumer electronics. Our mission is to make the connected home simple, secure, and accessible — every NovaTech device works together through a single app, the NovaTech Home app, with no hubs-of-hubs complexity or per-device subscriptions required to get started.

What We Make

- Smart security: Sentry Cam series cameras and LockGuard smart locks
- Networking: Mesh Router AX3000 and whole-home mesh systems
- Audio: NovaBuds earbuds and NovaSound portable speakers
- Personal computing: NovaBook laptops, NovaTab tablets, NovaWatch wearables
- Home automation: Glow Strip lighting and Hub Central automation hub

Our Support Philosophy

Customer support at NovaTech is powered by an AI-driven multi-agent platform available 24/7 through chat. Every question is routed to a specialist — billing, technical, product, privacy, or customer relations — and answers are grounded in our official published policies rather than generic responses. When a question falls outside our documentation, we say so clearly instead of guessing.

Commitments to Customers

- 30-day money-back guarantee on new purchases
- 1-2 year standard warranties, extendable with NovaTech Care+
- 99.9% platform uptime commitment for cloud-connected features
- No sale of personal data to third parties, ever
- Free standard shipping on orders over \$50

Sustainability

NovaTech devices are designed for longevity: replaceable batteries where feasible, a minimum of 4 years of security firmware updates per product, and a trade-in program that refurbishes returned devices rather than scrapping them. Packaging is 90% recycled or recyclable material.

Contact

Support: support@novatechsolutions.com or 1-800-NOVA-TECH. Privacy inquiries: privacy@novatechsolutions.com. Sales and business orders: through this chat platform or the NovaTech website.
