

# NovaTech Solutions — Installation Guide

Setup instructions for NovaTech smart home devices

## Before You Begin

- Download the NovaTech Home app (iOS or Android) and create an account
- Ensure your Wi-Fi network is 2.4GHz (most NovaTech devices do not support 5GHz-only setup)
- Have your Wi-Fi network name and password ready
- Make sure your phone's Bluetooth is enabled for initial pairing

## Setting Up NovaTech Hub Central

Plug in the Hub Central and wait for the light to turn solid blue. Open the NovaTech Home app, tap 'Add Device,' select 'Hub Central,' and follow the in-app pairing steps. The hub will automatically connect to your Wi-Fi network once configured.

## Installing Sentry Cam Cameras

- Mount the camera bracket using the included screws at your desired location
- Power on the camera and wait for the LED to blink blue (pairing mode)
- In the app, tap 'Add Device' > 'Camera' and scan the QR code on the camera base
- Adjust the camera angle and confirm live view before finalizing placement

## Installing LockGuard X1 Smart Lock

- Remove your existing deadbolt following standard door hardware removal steps
- Install the NovaTech mounting plate using the provided screws
- Attach the LockGuard X1 body and secure with the included fasteners
- Pair via the app, then set up at least one PIN code and fingerprint before relying on it
- Test the lock manually 5 times before considering installation complete

## Setting Up Mesh Router System

Connect the primary router to your modem via Ethernet cable. Power on all mesh points and place them within 30 feet of each other for initial setup. Use the app to name your network and set a password — mesh points will sync automatically within 2-3 minutes.

## Common Installation Issues

- Device won't enter pairing mode: hold the reset button for 10 seconds until the light flashes rapidly
- App can't find device: confirm Bluetooth is on and you're within 10 feet of the device
- Wi-Fi connection fails: confirm you're using a 2.4GHz network, not 5GHz-only
- Mesh points not syncing: move points closer together during initial setup, then reposition after

## Professional Installation

For an additional fee, NovaTech offers professional installation for smart locks and camera systems in select regions. Ask this chat platform to check availability in your area.
