

# NovaTech Solutions — Customer Support Guide

How to get help, what to expect, and how our AI support platform works

## Support Channels

- AI chat (this platform): available 24/7, instant responses
- Email: support@novatechsolutions.com — replies within plan-based SLA
- Phone: 1-800-NOVA-TECH during business hours
- Privacy team: privacy@novatechsolutions.com for data requests

## How the AI Support Platform Works

When you send a message, our system detects your question's topic, language, and urgency, then routes it to the right specialist agent: Billing, Technical, Product, Complaint, Privacy, or General Support. Complex questions may involve multiple specialists whose answers are combined into one reply. Responses based on official documents show a source citation so you know where the answer came from.

## Languages

You can write to support in your preferred language — including Spanish, French, German, Portuguese, Hindi, Chinese, Japanese, and Arabic — and receive replies in that language. Official policy documents are maintained in English.

## What to Have Ready

- Your order number (for order, shipping, or refund questions)
- Your device model name (e.g., Sentry Cam 2, LockGuard X1)
- The email address on your NovaTech account
- For technical issues: what you tried already, and any error message text

## Escalation to a Specialist

If the AI platform cannot resolve your issue, or you request human review, your conversation is flagged for our customer relations team. Escalated cases receive a response within the SLA for your plan tier — from 24-48 hours on Starter to 1 hour for Enterprise customers.

## Common Requests and Where They're Covered

- Refunds and returns — see Refund Policy (30-day guarantee)
- Delivery timelines and tracking — see Shipping Policy
- Device setup problems — see Installation Guide troubleshooting section
- Warranty claims and Care+ — see Warranty document
- Data deletion and exports — see Privacy Policy, or ask this chat directly

## Support Hours and Response Times

- AI chat: 24/7, replies in seconds
- Starter plan email: 24-48 hours
- Pro plan: 12-24 hours priority
- Business plan: 4-8 hours priority
- Enterprise: 1-hour guaranteed response, 24/7, dedicated account manager

## Feedback

After a conversation, you can rate the support you received. Feedback is reviewed weekly and used to improve both our documentation and the AI platform's response quality. Serious service complaints are always reviewed by a human.
